ABSTRACT (Thai)	vi
TABLE OF CONTENTS	viii
LIST OF TABLES	ix
CHAPTER 1 INTRODUCTION	1
CHAPTER 2 LITERATURE REVIEWS	3
2.1 Number of gene control	3
2.2 Gene and gene actions	4
2.2.1 Combining ability	6
2.2.2 Generation mean analysis	9
2.3 Heterosis	12
2.4 Generation variance and Heritability	14
2.5 Genetic advance from selection (genetic gains)	17
CHAPTER 3 MATERIALS AND METHODS	19
CHAPTER 4 RESULTS AND DISCUSSIONS	27
4.1 Number of gene control	27
4.2 Combining ability	32
4.3 Generation mean analysis	37
4.4 Heterosis	75
4.5 Generation variance analysis	86
4.6 Heritability	99
4.7 Genetic advance from selection (genetic gains) and response to selection	110
CHAPTER 5 GENERAL DISCUSSIONS	118
CHAPTER 6 GENERAL CONCLUSIONS	124
REFERENCES	126
APPENDIX	135
CURRICULUM VITAE	161

LIST OF TABLES

Table	Page
1 Number of effective factors (k) controlling the plant height, number of nodes per plant and number of branches per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	29
2 Number of effective factors (k) controlling the number of pods per plant and number of seeds per pod in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	30
3 Number of effective factors (k) controlling the 100-seed weight and seed yield per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	31
4 Combined analysis of variance for seed yield per plant and yield components in a diallel cross of azuki bean, grown at three highland locations in 2005 growing season	33
5 Combined analysis of variance for seed yield per plant and yield components in a diallel cross of azuki bean, grown at three highland locations in 2006 growing season	33
6 Estimate of general (g_i) and specific (s_{ij}) combining ability effects for seed yield per plant and yield components in a diallel cross of azuki bean, grown at three highland locations in two growing seasons, 2005 and 2006	36
7 Generation means and joint-scaling test for plant height in azuki bean crosses, grown at three highland locations in 2005 growing season	39
8 Estimation of genetic effects for plant height in azuki bean crosses, grown at three highland locations in 2005 growing season	40
9 Generation means and joint-scaling test for plant height in azuki bean crosses, grown at three highland locations in 2006 growing season	41
10 Estimation of genetic effects for plant height in azuki bean crosses, grown at three highland locations in 2006 growing season	42
11 Generation means and joint-scaling test for number of nodes per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	44

Table	Page
12 Estimation of genetic effects for number of nodes per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	45
13 Generation means and joint-scaling test for number of nodes per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	46
14 Estimation of genetic effects for number of nodes per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	47
15 Generation means and joint-scaling test for number of branches per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	49
16 Estimation of genetic effects for number of branches per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	50
17 Generation means and joint-scaling test for number of branches per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	51
18 Estimation of genetic effects for number of branches per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	52
19 Generation means and joint-scaling test for number of pods per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	54
20 Estimation of genetic effects for number of pods per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	55
21 Generation means and joint-scaling test for number of pods per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	56
22 Estimation of genetic effects for number of pods per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	57
23 Generation means and joint-scaling test for number of seeds per pod in azuki bean crosses, grown at three highland locations in 2005 growing season	60
24 Estimation of genetic effects for number of seed per pod in azuki bean crosses, grown at three highland locations in 2005 growing season	61
25 Generation means and joint-scaling test for number of seeds per pod in azuki bean crosses, grown at three highland locations in 2006 growing season	62
26 Estimation of genetic effects for number of seed per pod in azuki bean crosses, grown at three highland locations in 2006 growing season	63

Table	Page
27 Generation means and joint-scaling test for 100-seed weight in azuki bean crosses, grown at three highland locations in 2005 growing season	65
28 Estimation of genetic effects for 100-seed weight in azuki bean crosses, grown at three highland locations in 2005 growing season	66
29 Generation means and joint-scaling test for 100-seed weight in azuki bean crosses, grown at three highland locations in 2006 growing season	67
30 Estimation of genetic effects for 100-seed weight in azuki bean crosses, grown at three highland locations in 2006 growing season	68
31 Generation means and joint-scaling test for seed yield per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	71
32 Estimation of genetic effects for seed yield per plant in azuki bean crosses, grown at three highland locations in 2005 growing season	72
33 Generation means and joint-scaling test for seed yield per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	73
34 Estimation of genetic effects for seed yield per plant in azuki bean crosses, grown at three highland locations in 2006 growing season	74
35 Observed heterosis over mid-parent (H) and better-parent (H _b) values for plant height in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	76
36 Observed heterosis over mid-parent (H) and better-parent (H _b) values for number of nodes per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	77
37 Observed heterosis over mid-parent (H) and better-parent (H _b) values for number of branches per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	79
38 Observed heterosis over mid-parent (H) and better-parent (H _b) values for number of pods per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	80
39 Observed heterosis over mid-parent (H) and better-parent (H _b) values for number of seeds per pod in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	81
40 Observed heterosis over mid-parent (H) and better-parent (H _b) values for 100-seed weight in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	84

Table	Page
41 Observed heterosis over mid-parent (H) and better-parent (H _b) values for seed yield per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	85
42 Generation variance analysis for plant height in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	88
43 Generation variance analysis for number of nodes per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	89
44 Generation variance analysis for number of branches per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	90
45 Generation variance analysis for number of pods per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	93
46 Generation variance analysis for number of seeds per pod in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	94
47 Generation variance analysis for 100-seed weight in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	95
48 Generation variance analysis for seed yield per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	98
49 Heritability estimates for plant height in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	100
50 Heritability estimates for number of nodes per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	101
51 Heritability estimates for number of branches per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	103
52 Heritability estimates for number of pods per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	104
53 Heritability estimates for number of seeds per pod in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	106

Table	Page
54 Heritability estimates for 100-seed weight in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	107
55 Heritability estimates for seed yield per plant in azuki bean crosses, grown at three highland locations in two growing seasons, 2005 and 2006	109
56 Estimate of genetic gains (5% selected) for seed yield per plant and yield components in azuki bean crosses, grown at three highland locations in 2005 growing season	112
57 Estimate of genetic gains (5% selected) for seed yield per plant and yield components in azuki bean crosses, grown at three highland locations in 2006 growing season	113
58 Response to selection at 5% of selection for 100-seed weight in azuki bean	116
59 Response to selection at 5% of selection for seed yield per plant in azuki bean	117
