ACKNOWLEDGEMENT

The author would like to express her sincere gratitude and appreciation to Lecturer Prasit Chanarat, thesis advisor, for his guidance and suggestions throughout the study. Without his support and encouragement, this thesis would not have been successful.

She would like to extend her gracious thanks to Professor Panja Kulapongs and Associate Professor Decha Romcai, thesis co-advisors, for their guidance and valuable suggestions and corrections of this thesis.

She would like to express her thanks to Mr. Likhit Uthaisri and Ms. Hassanee Sookjinda, the medical technologist of the Red Cross Society, Chiang Mai (10th) for their kind help to giving CPD blood sample during the course of study.

She would like to extend her gracious thanks to Lecturer Mongkol Chotayaporn for his suggestions and construction of MC-1 apparatus.

She would like to thanks the officers of Departments of Clinical Microscopy, Clinical Immunology, Clinical Microbiology and Clinical Chemistry, Faculty of Associated Medical Sciences, Chiang Mai University for their kind helps.

Finally, she would like to express her deepest gratitude to her parents for their encouragement in pursuing her education.

This study is supported by Royal Thai Government budget.
