## ACKNOWLEDGEMENTS

I would like to express my deepest and most sincere gratitude to my thesis advisor, Assoc. Prof. Dr. Watchara Kasinrerk, for his guidance, excellent discussion, encouragement, unforgettably support and vast knowledge. Without his support and encouragement, this thesis could not be accomplished.

I would like to offer my special thanks to my co-advisor, Asst. Prof. Dr. Tanusak Tatu for his support in providing blood samples and excellent technical assistances. I also would like to thanks Dr. Sawitree Chiampanichayakul for her sincerely help, continuous discussions and valuable advices.

I would like to express my great appreciation to Asst. Prof. Dr. Wirawit Piyamongkol, of the Department of Obstetrics and Gynecology and Ms. Tasaneeya Chamrasratanakorn, of the Department of Pediatrics, Faculty of Medicine, Chiang Mai University for support in providing blood samples of hemoglobin Bart's hydrops fetalis.

I also wish to express my great appreciation to Miss. Supansa Pata for her guidance and interest in solving many problems throughout my works. I am indebted with Mr. Phadungkiat Khamnoi for his valuable support and training for purification of hemoglobin technique, and all staff member of the Assoc. Prof. Dr. Watchara Kasinrerk's laboratory for their advice, friendship and co-operation.

Many thanks are also extended to D.V.M. Adul Saengthong, of the Small animal hospital, Faculty of Veterinarian medicine and Mr. Apichai Khamrin, Faculty of Agriculture, Chiang Mai University for their support in providing animal

blood samples. And I wish to express my appreciation to all of my friends for their help and warm friendship.

I would like to thank the Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University for providing instruments and a place for the study.

Finally, I am especially grateful for my family members for their love, understanding and support, useful guidance and wonderful inspiration, all of whom were especially supportive and extremely helpful.

This study was supported by The National center for Genetic Engineering and Biotechnology (BIOTECH) and The Thailand Research Fund (TRF).
