ACKNOWLEDGEMENTS

I would like to express my gratitude and deepest appreciation to Asst. Prof. Dr. Wasna Sirirungsi, thesis advisor, and Dr. Nicole Ngo-Giang-Huong, Co-Advisor, for their excellent guidance, patience, continuous discussion and encouragements throughout this study. This thesis would not have been accomplished without their kindly help.

I extend my grateful to Asst. Prof. Dr. Pranee Leechanachai, Assoc. Prof. Dr. Parvapan Bhattarakosol, my examining committee, for their valuable suggestions and advice.

I am particularly grateful to Dr. Gonzague Jourdain for his kindly advice in statistical analysis in this study. I am also grateful to Dr. Marc Lallemand, a project director of the Program for HIV prevention and treatment (PHPT), for giving me an opportunity to work with professional research team.

I would like to express my sincere thanks to all staff members in PHPT laboratory and PHPT data management, all staff members and master degree students in the Division of Clinical Microbiology, Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University, for their helps and kindly suggestion.

I would like to thank the Division of Clinical Microbiology, Department of Medical Technology, and PHPT HIV biology laboratory, Faculty of Associated Medical Sciences, Chiang Mai University for their support in providing instruments, reagents, and place to study, and the Faculty of Graduate Studies for allowing me to have this project investigated.

Finally, I would like to express my special gratitude to my family and my friends for their love, understanding, encouragement, support, assistance and warm friendship which will never be forgotten.

This work was supported by Fogarty International Research Collaboration Award (FIRCA, NIH, USA), Grant number: R03TW01346-01.
