ACKNOWLEDGEMENT

“Thanks for Believing in Me, Dad and Mom”

This research paper was conducted in conjunction with the cluster initiative: the bottom up approach project under Ministry of Finance, royal Thai government. The project was separated into 6 sub-modules, cluster mapping was the 1st, Cluster Development Agents (CDA) Training was 2nd, Northern Handicraft was 3rd, Maeklong Basin 4th, Eastern cluster in Nakhonpathom and nearby provinces was 5th and Western Fruit and Vegetable clusters in Chantaburi province was the last module. This project was administrative under the Fiscal Public Policy Research Institute Foundation with strongly supported by the Office of Fiscal Public Policy, Ministry of Finance. The entire project took over 18 months and involved over 2,000 of cluster participants and CDAs.

People involved in this project consist of civil entrepreneurs who wish to see the better change in their communities, grass root people who wish to preserve their ways of life, and the most importantly were the people who believe in Thai's Indigenous and Sufficiency economy. Without the doubt, this research would not have enough substantial empirical evident from the cluster implementation and the outcome of the competitive advantage course of nature with out them. And without them, competitiveness “the bottom up approach” shall remain as the myth as a conceptual thinking framework.

And the most contribution for this study, I would like to thanks for are: C4C group who first introduced me and educated me over the years on the matter and the important of the “Competitive Advantage of the Nations” and the positioning for Thailand should be undertaken in the global competition, J. E. Austin and USAID who first initiated cluster methodology in Thailand in the year 2000, The National Economic and Social Development Board who collaborated and supported both top-down and bottom-up approaches together, my particular greatest gratitude to Dr. Pattanadej Thamajaree, the senior cluster project advisor, Dr. Kanit Sangsupun, The director of The Fiscal Policy Research Institute Foundation, Dr. Somchai Satjapong, the senior advisor of The Office of Fiscal Policy, Ministry of Finance and Dr. Nopasit Chakpitak, Dean of College of Arts, Media and Technology, Chiang Mai University and Dr.Tirapot Chandarasupasang, Head of Doctoral Studies on Knowledge Management, College of Arts, Media and Technology, Chiang Mai University for their visions, belief and will and their supports that allowed me to extended the work on my belief for better Thailand with competitive advantage of the nation approaches.

Anukul Tamprasirt
