ACKNOWLEDGEMENT

I would like to acknowledge the Ministry of University Affairs on providing good opportunity and scholarship for my graduate study. This grant highly supports my dissertation and new knowledge.

My grateful thank to the Faculty of Veterinary Medicine for supporting many facilities to disseminate the updated knowledge for my thesis.

I express my sincere gratitude to my supervisor, Dr. Siriwan Ongchai for her kindly advices, guidance and taking care on laboratory process to complete my thesis.

My deep appreciation goes for my consultant, Lieutenant Colonel Chumnan Trinarong in his excellent encouragement for my planing and collecting specimens.

Also, gratefully thanks to Associated Professor Dr. Ted Tesaprateep who gives me a nice opportunity and suggestion to solve problems.

I would like to give many thanks to Assistant Professor Prachya Kongtawelert for his guidance and supporting the facilities in the laboratory process.

I acknowledge all facilities from the department of Biochemistry, Faculty of Medicine, Chiang Mai University. Without these facilities, I cannot complete my research successfully.

I would like to give sincere thank to Miss Peraphan Pothachareon for her teaching and suggestion in laboratory process.

I also extend my thanks to all staffs of the Veterinary diagnostic center, the Faculty of Veterinary Medicine, Chiang Mai university for their helping in collecting and keeping specimens.

I deeply thank to all staffs of the Division of Equine Clinic, the Faculty of Veterinary Medicine, Chiang Mai University for their lovely friendships and helping in collecting samples and diagnostic techniques.

I would like to honor all of the horse's owners who have provided the data and specimens from their lovely horses.

Finally, I am deeply grateful to my family for their support, understanding and encouragement through out my study.
