ACKNOWLEDGEMENTS

The author would like to express the gratitude and appreciate thanks to Assoc. Prof. Dr. Watchara Kasinrerak, thesis advisor, for his thoughtful guidance, useful suggestions and kindness encouragement throughout this thesis study, especially the last final part which given a valuable suggestion on the manuscript throughout the accomplished thesis.

I wish to extend my gratefulness and appreciation to Prof. Dr. Thira Sirisanthana, my general advisor, Director of the Research Institute for Health Sciences, Chiang Mai University for his kindness giving me this opportunity to study and his guidance throughout the study.

I would also like to appreciate Dr. Sawitree Chiampanichayakul, co-advisor for her generous assistances and kindness suggestion throughout this thesis accomplishment

Many thanks to all research assistants and friends at laboratory of Assoc. Prof. Dr. Watchara Kasinrerak at the Faculty of Associated Medical Sciences which giving a fruitful discussion, sharing a valuable experiences. Thank you to colleagues at the Research Institute for Health Sciences for their warm technical support and helps.

Importantly, I would like to extend my great gratitude to my parents, sisters and brother for their support and encouragement throughout my study.

This work was supported by the Fogarty International Center/USNIH grant # 2 D 43 TW000010-16-AITRP, the Thailand Research Fund, and the National Center for Genetic Engineering and Biotechnology.
